Website: [Portfolio](#)

Founder / Lead Engineer, Media Hunters current

- Founded and managed Media Hunters, overseeing all aspects of business development and project engineering.
 - Designed and implemented scalable multimedia solutions, focusing on performance and user experience.
 - Led a multidisciplinary team, ensuring projects aligned with client objectives and industry standards.
 - Integrated cutting-edge technologies to foster innovation and competitiveness.
- Employed Agile methodologies and DevOps practices for efficient project delivery and continuous improvement.

Software Developer, Transition Technologies MS December 2022 - December 2023

- Developed a sandbox application for electricians to create and edit high-voltage tower diagrams using GoJS and Angular.
- Implemented state management with RxJS and NgRx for efficient data flow.
- Managed version control and collaboration through GitHub.
- Applied Agile methodologies to optimize project delivery.
- Integrated web accessibility features to ensure an inclusive user experience.

Mid Front-End Developer, Cobiro September 2021 - December 2022

- Developed no-code websites, enhancing modularity through Hexagonal Architecture, improving scalability and maintainability.
- Simplified interfaces by implementing the Facade Pattern, ensuring adaptability with Ports and Adapters.
- Managed code efficiently across projects using NX Monorepo, reducing duplication and enhancing collaboration.
- Automated CI/CD pipelines using CircleCI, streamlining deployment processes.
- Collaborated within Agile teams using Git, GitHub, and methodologies like Scrum and Kanban.

Junior Front-End Developer, Roche January 2021 - September 2021

- Developed internal applications for medical studies using Angular and TypeScript, incorporating RxJS for efficient state management.
- Applied layered architecture and design patterns (SOLID, State, Mediator) to maintain code quality and modularity.
- Customized UI components with Angular Material and SCSS, creating reusable styling elements.
- Conducted testing with DataDog Synthetics, Karma, Jasmine, and Jest to ensure application stability.
- Utilized Git and GitHub for version control, adhering to Scrum and Kanban methodologies.

Junior Front-End Developer, BRAINODE sp. z o.o. August 2020 – July 2021

- Developed an online currency exchange platform using Angular, TypeScript, and RxJS for dynamic data handling.
- Designed UI/UX elements with Figma, employing atomic design principles for modularity.
- Managed state with NgRx and implemented patterns like Factory, Builder, and Singleton to enhance code reusability.
- Styled responsive layouts using Bootstrap and custom SCSS, ensuring consistency across devices.
- Conducted unit testing with Karma/Jasmine and E2E testing with Cypress for quality assurance.
- Utilized Git and GitHub for version control, following Agile methodologies with Jira for task management.

Skills

Programming Languages

JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL

Libraries & Frameworks

Angular, React, Next.js, NgRx, RxJS, Redux, Node.js, Express.js, Bootstrap, SASS/SCSS, Angular Material, Storybook, Webpack, GSAP, jQuery

Tools

Git, GitHub, CircleCI, Jenkins, Docker, Firebase, Heroku, Netlify, Vercel, Figma, Jira, Confluence, Agile (Scrum/Kanban), NX Monorepo

Design Patterns & Architecture

Cypress, Jest, Karma, Jasmine,

Other Skills

Responsive Design, Web Accessibility (WCAG), UI/UX Design, API Integration, CI/CD Automation

Soft Skills

- Teamwork: Proven ability to collaborate in multidisciplinary teams with strong interpersonal skills.
- Communication: Effective communicator with both technical and non-technical stakeholders.
- Analytical Skills: Proficient in problem-solving and project requirement analysis.

Adaptability: Quick learner, adept at adapting to new technologies and methodologies.

Additional Information

I am fluent in Polish (native) and have advanced proficiency in English (C1 level).

Interests

- Hobbies:
 - Tennis
 - Climbing
 - Exploring app architecture
 - Enjoying gummy bears
- Passion:
 - Developing accessible digital experiences

Staying updated with the latest technology trends
